

Short Investor Q&A

Q: Why invest with ZMDC now?

A: Global demand for nickel, PGMs, cobalt and battery metals is accelerating at record pace. Zimbabwe holds tier-1 critical mineral deposits and ZMDC provides structured, transparent joint-venture paths into these assets.

Q: What is ZMDC's flagship platinum opportunity?

A: The **Northridge Platinum Project**, a 50% JV opportunity valued at USD 60 million, supported by over **21,804m of drilling**, 3D geological modelling, defined Measured–Indicated–Inferred PGM resources, and a prime location along the Great Dyke.

Q: What makes ZMDC Nickel attractive for investors?

- A:**
- 108 registered nickel claim blocks covering 8,280+ ha
 - Multi-deposit portfolio: Nickel Hill, Nickel Kop, Woodridge, Elmo, Hunters Road
 - Demonstrated historic resources (e.g., **10 Mt @ 0.44% Ni at Nickel Hill**)
 - 70 Mt SAMREC/JORC exploration target
 - Strong logistics: roads, rail, high-voltage power, nearby processing hubs

Q: What is the expected development timeline?

A: ZMDC's structured two-year program includes drilling, metallurgical work, resource updates, and feasibility studies — providing a clear runway towards mine development.

Q: What partnership structures does ZMDC offer?

A: ZMDC offers JV equity partnerships, project financing partnerships, and operational management agreements, with government-backed security and regulatory compliance.

Q: What is Zimbabwe's mining stability profile?

A: Zimbabwe has a long mining history, strong workforce, and well-developed mining legislation. ZMDC assets come with verified title, historic data, and stable operational environments.
